

Friends and Family Returns February 2024 PPG Analysis for Adey and Dancy, Tarporley Practice

This latest analysis covers February 2024 and is the twenty-first analysis since the scheme was restarted in May 2022.

This month the number of responses was very good especially on-line. There were 65 Responses of which 40 were on-line, the highest number yet, and exceeded the paper returns. Friends and Family Survey responses are the only feedback the PPG receives and consequently are an important part of the PPG's and the Practice's efforts to improve the services provided.

Once again, comments have been categorised into the same 3 main headings. (Please note that all comments are anonymous, and only those comments where the patient gave permission to share them have been analysed.)

As a reminder, below is the definition of these categories.

Medical Service Comments – These consist of issues directly associated with seeing a GP or Nurse. They can probably only be addressed by the Medical Staff.

Administrative Service Comments – These consist of issues associated with trying to get an appointment to see a medical practitioner. They are mainly in the control of the Practice Manager. (Waiting time to get an appointment is also a function of the number of GPs)

Health Centre Environment Comments – These consist of issues associated with the 'experience' of visiting the Health Centre.

The number of Responses received during the period was 65. Of these 58 rated the Practice **Very Good**; 5 rated the Practice **Good**; 1 rated the Practice **neither Good nor Poor**; 0 rated the Practice **Poor** and 1 rated the Practice **Very Poor**. These are the 5 categorisations in the new F&F scheme.

A total of 58 comments were made of which 42 were extremely positive about the standard of care provided by all the Practice staff. **Every member of staff should be proud of their contribution.**

Issues for the Practice to note from the latest responses.

1. Some confusing information regarding pharmacy services and children was received. Some refresher training should be considered in this area.
2. There were comments about the good availability of appointments although a desire to get advice more easily was expressed.

See Table of Comments below for more detail.

Jim Hill
